

Personal hygiene survey results

Class or group _____

Date _____

Number of answers _____

Tally how many people ticked each box. Percent agree = (number of 4s + number of 5s) divided by the total, times 100.

STATEMENT	1	2	3	4	5	TOTAL	% AGREE
1. I can always get soap and water to wash my hands.							
2. I know when it matters most to wash my hands.							
3. Keeping myself clean helps me avoid getting sick.							
4. I have the soap and toothpaste I need at home.							
5. Taking time to keep clean is worth it, even on busy days.							

Yesterday, when did you wash your hands with soap

AFTER THE TOILET	BEFORE EATING	BEFORE COOKING	AFTER A SNEEZE OR COUGH	AFTER TOUCHING TRASH	NONE OF THESE

Strengths

The two statements with the highest percent agree.

Fix this first

The two statements with the lowest percent agree.

What the open answers say

Sort the comments into three or four themes.

You said, we will

What the group told us, and the first thing that changes: soap, time or a lesson.
